

Fido

mod: 2280
design by Giulia Pretti

Table cuckoo clock that is inspired by the shapes of a famous TV from the 60's, incorporating clean, soft and rounded lines. An object that is 'already at home', already present in the memories of many or in the imagination of those who are fascinated by the years which saw the first steps on the moon, myths that were born and still exist today, such as The Beatles and The Rolling Stones, as well as many events that have left a mark. Fido is made of black-painted wood. It is a compact object that can be placed on a shelf, furniture or on your desk as a trusted companion during hours spent at work. Battery quartz movement.
