q02

mod: 1730
design by Alberto Sala

Q02 is the first clock that doesn't follow the trend of cuckoo clocks with a traditional birdhouse that have symbolised these type of clocks for years. The Q02 cuckoo function is displayed by a simple coloured horizontal or vertical line which is both innovative and effective. The pendulum and the writing 'coo ckoo!!', which give the idea of a little cuckoo bird, complete the clock. The battery powered movement has a photosensitive sensor that automatically turns off the cuckoo sound in the absence of light. It also has a switch to regulate the volume of the cuckoo sound or to switch it off completely.
