

Monolith

mod: 2541
design by Ewald Winkelbauer

The Monolith cuckoo clock designed by Ewald Winkelbauer is an asymmetrical monolithic block with a birdhouse cut into it. The hands, which are also not symmetrical, complete the face. The structure has been created in wood using a complex technique and painted with non-toxic paints. One version has been finished with a liquid metal base making it sophisticated and unique. Perfect for any refined, elegant atmosphere. The high-quality, German-designed cuckoo movement is powered by two batteries, a light sensor prevents the cuckoo from calling when it is dark. A switch allows the sound to be regulated or switched off completely.
