Crooked

mod: 2380
design by Alberto Sala

Crooked, designed by Alberto Sala, is an amusing cuckoo clock of unconventional style with crooked and uneven shapes that intensify its impactful design. The recurrence of uneven shapes and cheerful colours skilfully mixed by the designer and applied from the base to the roof of the cuckoo 'house', make it unique. The round pendulum which is also coloured, is the only shape we are familiar with. It appears almost unnaturally at the tilted base of the clock highlighting its dissymmetrical shape. The clock is made of wood and is varnished with nontoxic paint. It is available in four versions: the first two are orange and red or green and navy, the third and fourth have a wooden element and are made in pale wood with blue and navy details or dark wood with red and green details. It features a quartz mechanism, battery run, with an intelligent sensor that automatically turns off the cuckoo sound in the absence of light.
