

Don

mod: 2460
design by Francesco Paolo Maria Giuliani

Don, designed by Francesco Paolo Maria Giuliani, is a tribute to the places, squares, and urban landscapes of historical centres that are keepers of time and traditions. The tower and the bell tower represent the iconographic value of history and time of our cultural roots. The slender structure is made of steel and is completed by a useful shelf. Coloured with non-toxic paints, it uses a battery movement of German manufacture.
