

Cucu_Chic

mod: 1927
design by Riccardo Paolino e Matteo Fusi

The minimalist design, the rounded corners, the glossy finish and the chrome details make this cuckoo clock an item suitable for any dwelling where elegance reigns. A parallelepiped and a house with an asymmetrical roof are the two simple shapes that the designers defined for the two versions of Cucu Chic. It is made of wood and is entirely hand painted with non-toxic gloss varnish. The battery powered movement has a photosensitive sensor that automatically turns off the cuckoo sound in the absence of light. It also has a switch to regulate the volume of the cuckoo sound or to switch it off completely.
