Progetti

Mr. Orange

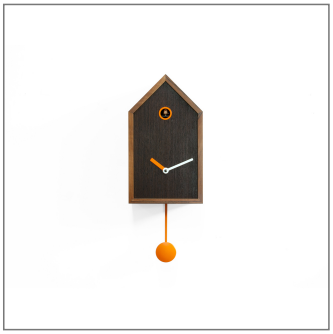

mod: 2190
design by Alberto Sala

Wall cuckoo clock with the classical form, already known and appreciated, to which we are attached: the cottage. Here, however, the lines are clean, simple, the structure is reduced to the essence. Mr. Orange, designed by Alberto Sala, is realized by a solid walnut grid with reduced section that defines a number of areas filled with different patterns. As a painting, the structure acts as a frame. You can choose between different textures to give the preferred form to Mr. Orange and match the style of your home.
