Birdwatching

mod: 2240
design by Studio Kuadra

The ironic and green design of Bird Watching leads us to observe cuckoos in the woods. It is a table cuckoo clock that decorates desks, shelves and furniture, at home or the office. The watch tower, in wood, on which are positioned the silhouettes of two birdwatchers ready toÂ photograph. The tree, with a little bird hidden among the foliage, is entirely covered in MOSS by Verde Profilo, a natural lichen that can be used indoors rooms lacking natural light, without undergoing changes. A light sensor automatically turns off the cuckoo sound in the absence of light.
