

Dr. Watch

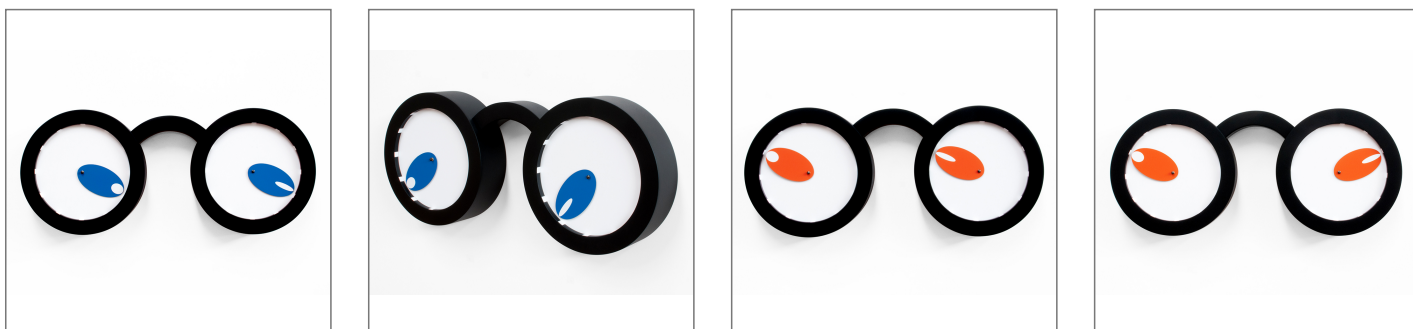

mod: 2300

design by Enzo Calabrese

A witty and funny clock, also suitable for children's rooms, in the shape of typical cartoon eyeglasses where the eyes move independently marking the hour and minutes. In the left 'lens' the pointer marks the hour while in the right 'lens' the minutes are shown. The structure is made of black-painted wood and is composed of two circular elements, with a white interior and orange or blue 'pupils' that are joined by a curved 'bridge'. Battery quartz movements.
