

CucuBall

mod: 2315
design by Manuel Barbieri

Colorful, playful and with a soft shape just like the chewy sweets that inspired itâ€™s design â€“ delightful, bright colored jellies of various sizes. Ball is a charmingly amusing cuckoo wall clock, the main body is in white varnished wood where the hands and the cuckoo are set. It has twelve wooden cylinders of different diameters and colors which give the clock an unusual attractive shape. It is available in two chrome variations, one with warm color shades which vary from red to yellow to orange and the other with colder shades which vary from blue to green to purple. Ball blends in with all kinds of decor and style. The Cuckoo strike is switched off automatically during the night controlled by a light sensor.
