Progetti

Tris

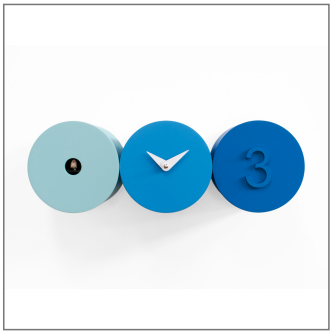

mod: 2325
design by Gianluca Minchillo

Three aligned cylinders in different colors give life to this wall or tabletop cuckoo clock. Tris with its appealing design is an ideal furniture accessory which suits any type of setting or decor. Tris has three elements, three chrome variations each with three colors. It is in fact available in the elegant shades of grey (with white, grey and black cylinders), in the warm bright shades of orange and red and last of all, in the colder shades of blue, turquoise and navy. Each element is made of varnished wood and plastic and has its own individual function: the first contains the cuckoo mechanism, the second the hands which are always white and the last emphasizes the number 3 which indicates the hour but also reinforces the trio concept.Battery quartz movement. The Cuckoo strike is switched off automatically during the night controlled by a light sensor.
