

Twin

mod: 2340
design by Studio Kuadra

Innovative, environment friendly and elegant in its simplicity. As always, the products designed by Studio Kuadra are a concentrated combination of research and creativity. Twin is a cuckoo clock, but whatâ€™s new is the material used for its creation: in fact it is completely made of corrugated cardboard, a very unusual type of material for this product. The structure of the cardboard is enhanced by the curves of the clock that highlight the corrugated edge giving the effect of continuous movement. The colour is the natural shade of the cardboard which has been adorned on the front with white, red, violet or black colouring. It is horizontally wall or table top. It has a quartz mechanism with a photosensitive sensor that automatically turns off the cuckoo sound in the absence of light.
