

Barcode

mod: 1085
design by Manolo Bossi

Designed in 2000 by Manolo Bossi, the Barcode watch was one of the first watches to use LEDs. Progetti, always looking for new technologies, had developed this new and revolutionary system to indicate the hours already for some years with Sunled, Led and Softled products. Barcode stood out for the quality of the design and the materials used so much as to have been imitated by many competitors.
