

Candy

mod: 2375
design by Alberto Sala

Candy, designed by Alberto Sala, is a cuckoo clock that is cheerful, sweet and slender shaped like candy sticks that give such pleasure to so many children. The white stripes alternate with the coloured ones in a sequence that enhances the upright shape making this clock a special feature to suit any home. It can be placed anywhere and only takes up a small narrow space on a wall. It is made of wood and nontoxic red, blue and white paint. The white version has shimmering silver stripes. It features a quartz mechanism, battery run, with an intelligent sensor that automatically turns off the cuckoo sound in the absence of light.
