

Kafka

mod: 2480
design by Isato Prugger & Luca Venturelli

This concept is based on the formal combination of two furniture complements, a clock and a mirror. The soft but modern lines are reminiscent of the domesticity typical of Scandinavian furniture, and the shape is the natural result of elongating a circumference (the clock), and allows for the possibility of looking in the mirror. The simple but elegant design makes it ideal for different living contexts. Made of glass and metal painted with non-toxic paints. Quartz movement high-quality German-made battery powered.
