

Kreis

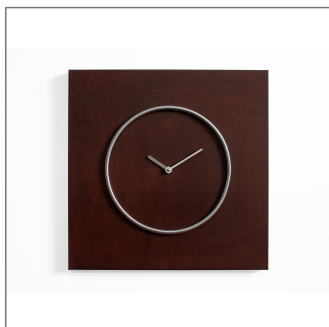

mod: 2530

design by Progetti C.R.

Kreis is a simple yet elegant wall clock made of Corten steel and stainless steel. Corten steel weathers naturally forming a rust-like, protective patina. The choice of using high quality, inalterable materials allows it to be used in environments where salinity is high or outdoors. It cannot however be exposed to driving rain. High quality battery-operated quartz movement manufactured in Germany.
