

Serie speciale del Trentennale

mod: 2537
design by Riccardo Paolino e Matteo Fusi

The vast, colourful array of different finishes is constantly evolving. A way has been found to render metal fluid so it can be applied to wood and the effect it creates is stunning and absolutely original. The application procedure is fairly complex and this is what makes it so precious and unique. No two pieces are alike. So to mark our thirtieth anniversary, we decided to produce a limited edition of 10 numbered pieces of some of our most remarkable items: q01, Cucu_chic, Long_time and Fido. This led to a number of outstanding products being developed, which not only look like metal, they actually feel like real metal to the touch. Highly particular and exclusive, they are intended for only true connoisseurs of quality design.
