

## Deep

mod: 2405
design by Studio Kuadra

Inspired by architectural cornices and frames that cover the facades of modern buildings, Frame is a clock with many different faces. The magnets inserted in the parallelepiped structure of the clock allow a choice of angle of the frame thus exalting the polyhedral design. It can be hung or left on a flat surface. The frame is available in two versions: with a rod structure or with iron sheeting. The central element is made of varnished wood.  The quartz mechanism is battery operated.
