

Deep

mod: 2408
design by Studio Kuadra

Inspired by architectural cornices and frames that cover the facades of modern buildings, Frame is a cuckoo clock with many different faces. The magnets inserted in the parallelepiped structure of the clock allow a choice of angle of the frame thus exalting the polyhedral design. The version with cuckoo mechanism is a table-top clock. The frame is available in two versions: with a rod structure or with iron sheeting. The central element is made of varnished wood. It features a quartz mechanism, battery run, with an intelligent sensor that automatically turns off the cuckoo sound in the absence of light.
